# Course objectives

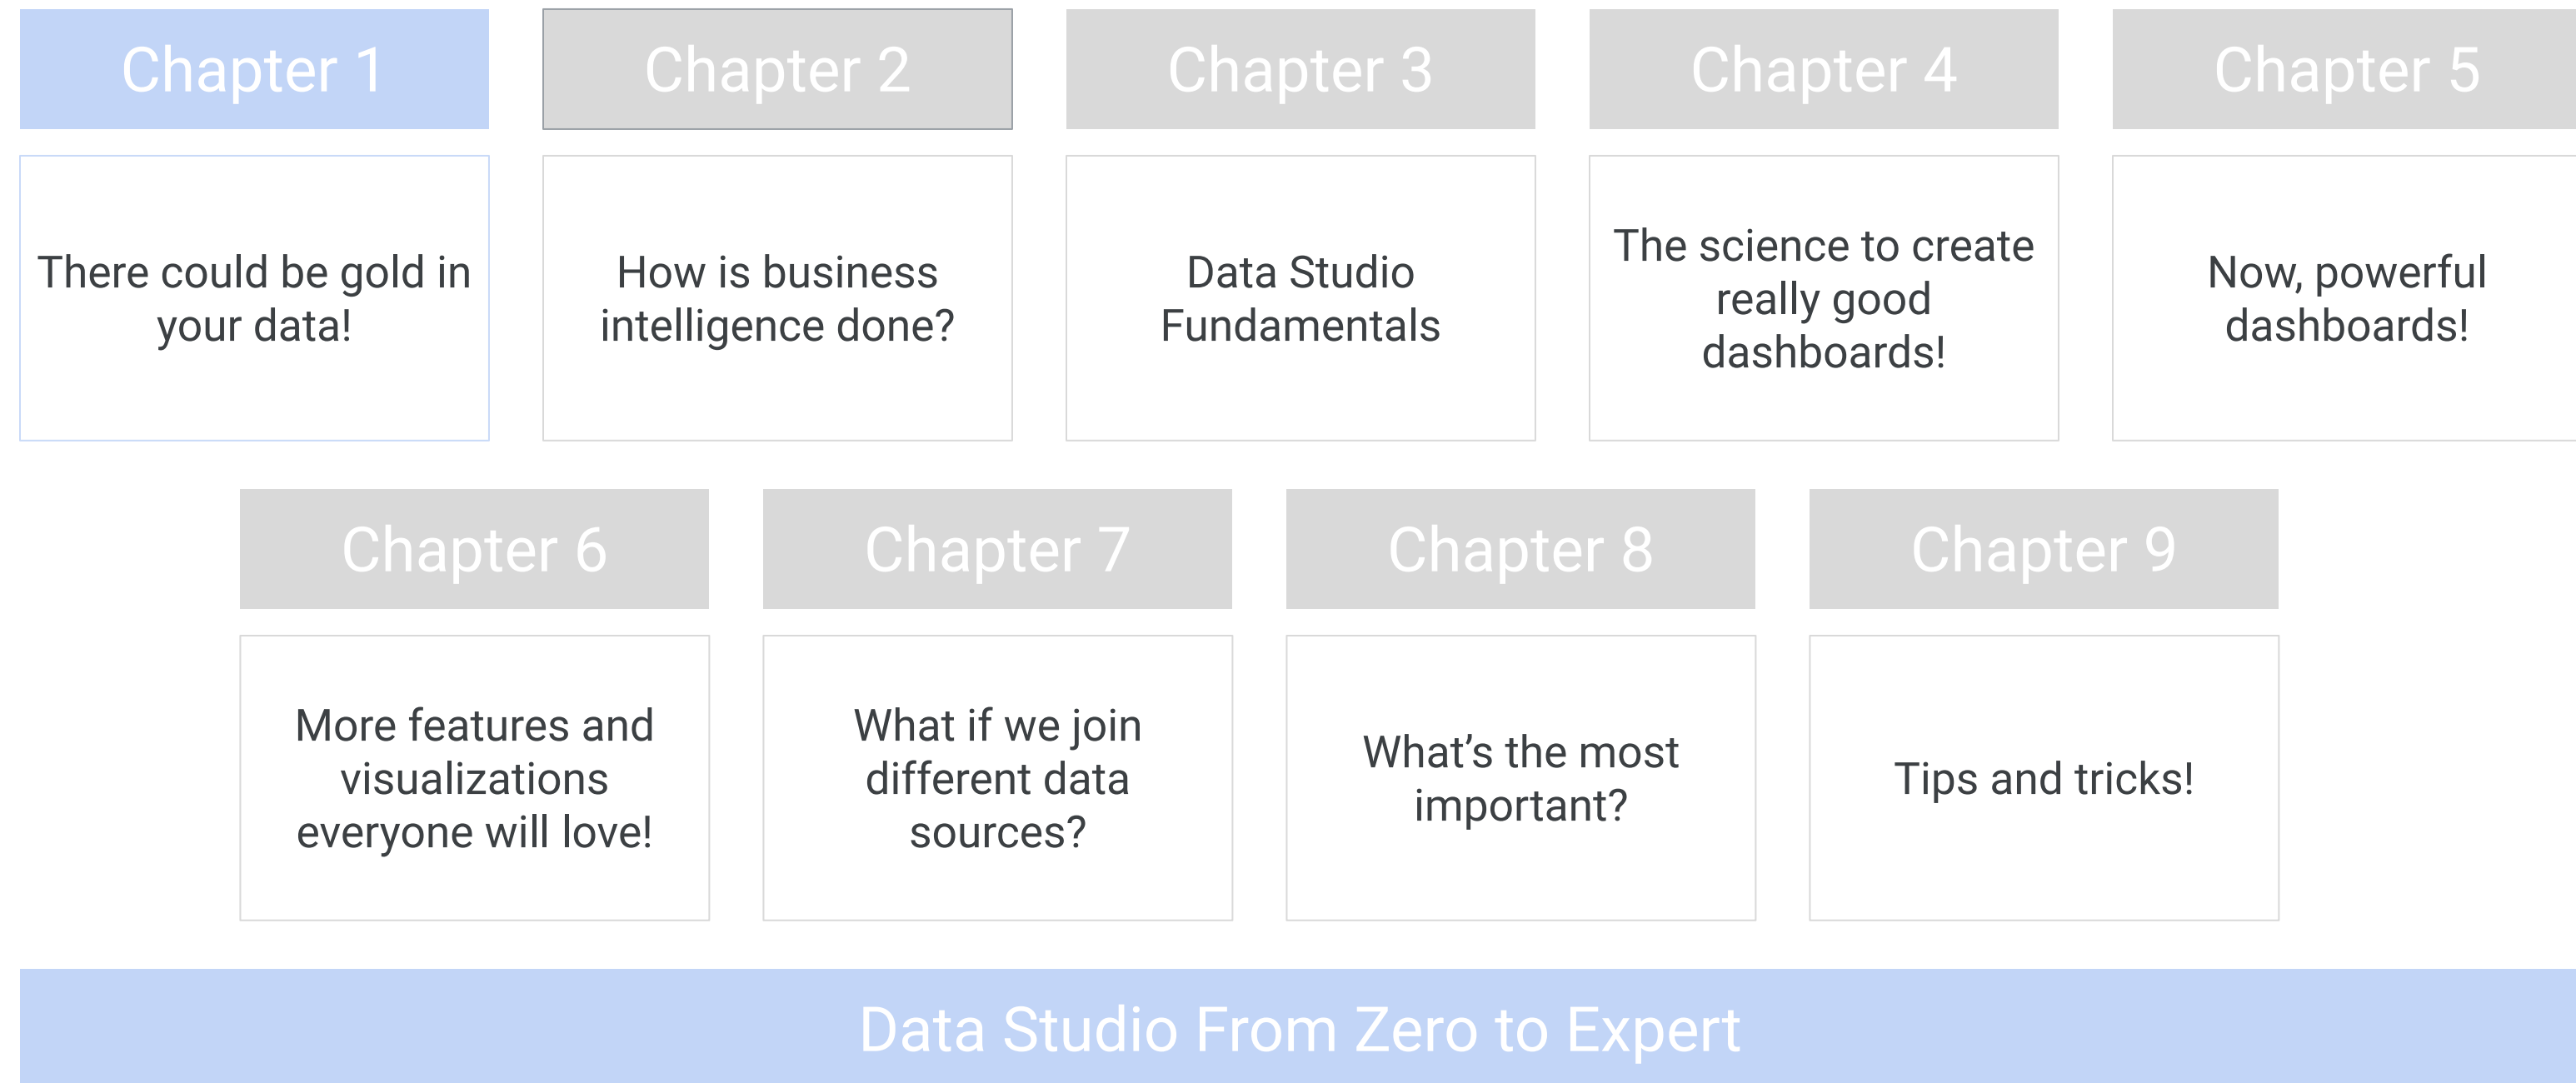

Chapter	Objectives
There could be gold in your data!	Discover the opportunities you have through data.
How is business intelligence done?	Discuss meaning, roles, tools and strategies.
Data Studio Fundamentals	Discover the features that Data Studio has for you.
The science to create really good dashboards!	Discuss how to create dashboards and reports that people love to use
Now, powerful dashboards!	Practice the best techniques to create powerful dashboards
More features and visualizations everyone will love!	Interactive filters, sorting, conditional expressions, dates, calculated metrics and dimensions, maps, hierarchies, tables/reports, plugins and more.
What if we join different data sources?	Discover the possibilities of working with more data and new sources.
What's the most important?	Discover sharing, security and cost
Tips and tricks!	Templates and improve the performance,

# Hands-on labs

- 5 hands-on labs across the course
- 1 final challenge labs
- Hosted on Qwiklabs and your account
- Access to a set of resources, in a clean environment with required permissions, for a fixed amount of time at no additional charge

# Course map

# Chapter 1

There could be  
gold in your data!

# You will learn...

Why the data analysis will become the basis of all future service offerings and business models

- Discuss the opportunities and threats around the data
- Discuss how major industries are using your data

- A. Analysis only matters if it is meaningful and actionable
- B. Key performance indicators (KPI's) not need to change
- C. When assigning work, focus on the result, not the process
- D. When doing work, focus on the process, not the result

# Quiz

## Answer 1/4

Which is not a basic principle for analyzing data?

- A. Analysis only matters if it is meaningful and actionable
- B. Key performance indicators (KPI's) not need to change
- C. When assigning work, focus on the result, not the process
- D. When doing work, focus on the process, not the result

# Quiz

## Question 2/4

What is the most popular and recommended source to perform BI?

- A. Transactional system
- B. Google Sheets / MS Excel
- C. Data Warehouse
- D. Flat files

# Quiz

## Answer 2/4

What is the most popular and recommended source to perform BI?

- A. Transactional system
- B. Google Sheets / MS Excel
- C. Data Warehouse
- D. Flat files

# Quiz

## Question 3/4

What features does version 3.0 of BI include to improve decision making?

- A. Machine learning
- B. Virtual processing
- C. Computer vision
- D. OLAP processing

# Quiz

Answer 3/4

What features does version 3.0 of BI include to improve decision making?

- A. Machine learning
- B. Virtual processing
- C. Computer vision
- D. OLAP processing

# Quiz

## Question 4/4

The classification of the data in BI Dashboards are

- A. Dimensions and metrics
- B. Interactive charts and filters
- C. Processing and storage
- D. Approach and result

# Quiz

Answer 4/4

The classification of the data in BI Dashboards are

- A. Dimensions and metrics
- B. Interactive charts and filters
- C. Processing and storage
- D. Approach and result

# Agenda
